## WORK EXPERIENCE

[ 01/12/2024 – 01/03/2025 ]

### Full Stack Engineering Intern

**City**: Kochani | **Country**: North Macedonia

- Contributed to the development of web applications, focusing on both frontend and backend solutions using modern technologies such as **React.js**, **Tailwind CSS**, **Node.js**, **TypeScript** and **MySQL**.
- Followed agile workflows, utilizing **Jira** to manage tasks and track progress efficiently.
- Gained proficiency in **Git** and version control best practices by creating branches for tasks, resolving conflicts, and submitting pull requests on **Bitbucket** for mentor feedback and code integration.

## PROJECTS

### Sutlijash

Collaborated on the development of a website using **React.js**, **Tailwind CSS** and **TypeScript**, with **MySQL** as the database. The platform aggregates and displays news articles specific to Kochani and its surrounding area. The backend integrates with ChatGPT to retrieve and categorize articles from dedicated local websites, centralizing the content and providing links to the original sources.

### Book Shop

Developed an e-commerce website for books using **Java**, **Spring Boot**, and **PostgreSQL**, with **HTML**, **CSS**, and **Thymeleaf** for the frontend. Features include user authentication, a shopping cart, and admin controls for managing books.
